David Chang (張逸)

- Title: **AI Team Tech Lead | LLM · AI Agent · RAG · MCP**
- Contact: black.heptagram@gmail.com • github.com/j129008
- Education: M.S. in Computer Science, National Chengchi University • B.S. in Computer Engineering, National Chiao Tung University

Summary

- 6+ years of Python backend, grown to Tech Lead; leading an AI team shipping LLM products for enterprises
- Cross-domain experience spanning AI agents, live streaming, advertising platforms, and recommendation systems (Python, FastAPI, LangGraph, RAG, MCP, Vue 3)

Experience

Riversoft, AI Team Tech Lead

2025-04 ~ Present

- AI Agent: **Contributed to the core AI agent platform: agent testing & QA, tool integration, dev environment, feasibility studies** (Python, LangGraph)
- AI Workforce: **Built the front end of an "AI digital workforce" platform — create AI workers through conversation, monitor them in real time, escalate exceptions to humans** (Vue 3)
- AI Ops Center: **Built an AI customer-service operations center monitoring AI conversations across channels (e.g. LINE), with human takeover at any time**
- MCP: **Created a cross-team MCP Tool validation framework (schema, design quality, connectivity, live agent testing), standardizing how product teams integrate with AI agents** (MCP)
- Semantic Search: **Built a partner SDK for vendors to upload product data (PDF / Excel / URL) and query it via AI semantic search** (RAG, GraphRAG)
- Leadership: **Led architecture planning for AI projects (medical-document OCR, LINE Bot disaster reporting); own sprint/milestone planning, task assignment, code review, risk assessment, and multi-environment releases** (CI/CD)

Koodata, Backend Engineer (Python)

2021-07 ~ 2025-03

MVP Rapid Development (2023-11 ~ 2025-03)

- **Designed architecture for advertising products (Ad Bingo Card, multi-platform campaigns, approval systems) and established development workflows**

koo-social Advertising Data Reporting (2022-10 ~ 2023-11)

- **Built ad data crawlers, chart tools, and report systems; optimized data processing speed** (Cloud Run, Selenium, Looker Studio)

koolive Live Streaming (2021-07 ~ 2023-10)

- **Designed live streaming system with stress testing for high-concurrency (QPS 1000+), supported FoodPanda live events** (Django, Redis, GraphQL, Kubernetes)
- **Fixed message loss/duplication, implemented payment and third-party integrations** (Celery, Thread, DB Transaction)

Truelove, Backend Engineer

2020-03 ~ 2020-09

- **Established unit testing environment, validated salary reports, optimized API reducing DB load by 50%** (Pytest, Docker, Pandas, Flask, Redis)

Ovomedia, Software Engineer

2019-03 ~ 2020-03

- **Collaborated with NTUST AI Center on TV recommendation system, built data labeling website and engine** (Django, Keras, Pandas, MariaDB)
- **Integrated FarEasTone smart speaker control and updated membership center** (OAuth2, Docker, PHP Phalcon)

Skills

Programming: Python
AI & ML: LLM, AI Agents, LangChain/LangGraph, RAG/GraphRAG, MCP, OpenAI / Gemini / Claude APIs
Backend / Frontend: FastAPI, Django, Celery / Vue 3
Database: PostgreSQL, Neo4j, Elasticsearch, Redis
DevOps & Cloud: Docker, Kubernetes, AWS, GCP, CI/CD
